SUMMARY

Computer Science undergraduate with strong foundations in data structures, algorithms, and backend development. Experienced in building full-stack MERN applications with REST APIs, authentication, and database design.

SKILLS

Languages: Java, JavaScript, C++

Backend: Node.js, Express.js

Frontend: React.js, HTML, CSS

Databases: MongoDB, SQL

Tools: Git, GitHub, VS Code

CORE COMPUTER SCIENCE

Data Structures & Algorithms, OOP, Operating Systems, Computer Networks, DBMS

PROJECTS**Job Application Tracker**

Designed and developed a MERN-based job tracking platform using RESTful APIs, authentication, job-state workflows, and MongoDB indexing for efficient querying.

Digital Calendar

Built an event management application using MERN stack; implemented CRUD APIs, handled edge cases like overlapping events, and date validation.

Hospital Management System

Developed a hospital data management system using PHP and SQL to manage patient records and doctor workflows.

ACHIEVEMENTS

Hackathon Code-A-Hunt (LPU): Ranked 15th out of 200 teams in a 24-hour competitive coding event.

EDUCATION

B.Tech in Computer Science & Engineering, Lovely Professional University (CGPA: 7.45)
